

**Subscriber Notification Report
August 10, 2005
WC Docket No. 05-196**

This report is for Express Technologies, Inc., a Voice over IP service provider in Moline, IL.

Express Technologies, Inc. has mailed a letter, on August 09, 2005 to each customer advising prominently and in plain language, the circumstances under which E911 service may not be available through the Express Technologies service or in some way may be limited by comparison to traditional E911 service.

Zero subscribers have submitted an affirmative acknowledgement, as of the date of this report. We estimate that we will receive acknowledgement from 100% of our subscribers by August 29, 2005.

Express Technologies has not as of the date of this report distributed warning stickers to any of our subscribers as we are in the process of having them printed. Express Technologies will have stickers printed and distributed to all subscribers by August 29, 2005.

Express Technologies plans to disable subscriber accounts, per the FCC rules, on August 30, 2005 if the subscriber has not sent acknowledgement back.

Express Technologies is maintaining acknowledgements received from subscribers in a binder labeled 911 Notification Acknowledgements and is tracking the receipt of such acknowledgements in an Excel spreadsheet. Express Technologies currently only has 12 subscribers so we believe this to be a sufficient method of tracking their acknowledgements.
